Why Froehling Anderson? | Pg. 11

The Process

The R&D Tax Credit is an incentive to entice companies to start or continue:

- Making new products/services, or
- Improving existing products/services, or
- Improving the process by which products are made

Industries with Qualified Research include, but are not limited to:

- Manufacturers (Traditional or Contract)
- Architects
- Software Developers
- Professional Engineering Firms

The Process Continued...

1. IDENTIFY COMPANY'S ACTIVITIES

MANY COMPANIES ALREADY USE JOB NUMBERS
TO TRACK COSTS BY JOB.

JOB

JOB
02

JOB
03

JOB
04

2. QUALIFY R&D PROJECTS

FROEHLING ANDERSON WILL HELP IDENTIFY
QUALIFYING R&D PROJECTS.

JOB

3. VERIFY THE ELIGIBLE COSTS

FROEHLING ANDERSON WILL HELP VERIFY THE QUALIFIED
SPENDING ON R&D PROJECTS

WAGES

SUPPLIES

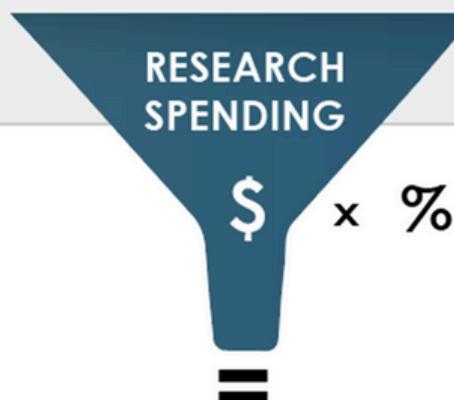

CONTRACT
LABOR

The Process Continued...

4. QUANTIFY TAX SAVINGS

WE ADD UP ALL THE ELIGIBLE EXPENSES FOR THE TAX CREDITS, AND MULTIPLY THAT BY A PERCENTAGE.

5. ENJOY YOUR TAX CREDITS

THE CREDITS BECOME "DOLLAR FOR DOLLAR" TAX SAVINGS.

Four-Part Test

Permitted Purpose

- Intended to develop or improve a product or processes
 - Functionality
 - Performance
 - Quality/Reliability
 - Cost Reduction
- Not Aesthetics

Technical Uncertainty

- Capability or Methodology uncertainty for developing or improving a product or process
- Company does not initially know answers to questions like:
 - Can we reach our goal, or
 - How are we going to reach our goal?

Process of Experimentation

Examples include any of the following:

- Evaluation of Alternatives
- Prototyping
- Testing
- Modeling
- Simulation

Technological in Nature

- Activity must rely on principles of one of the following sciences:
 - Engineering
 - Physical Sciences
 - Computer Sciences
 - Biological Sciences
- No Social, Economic, or Psychological Sciences

Product Life Cycle

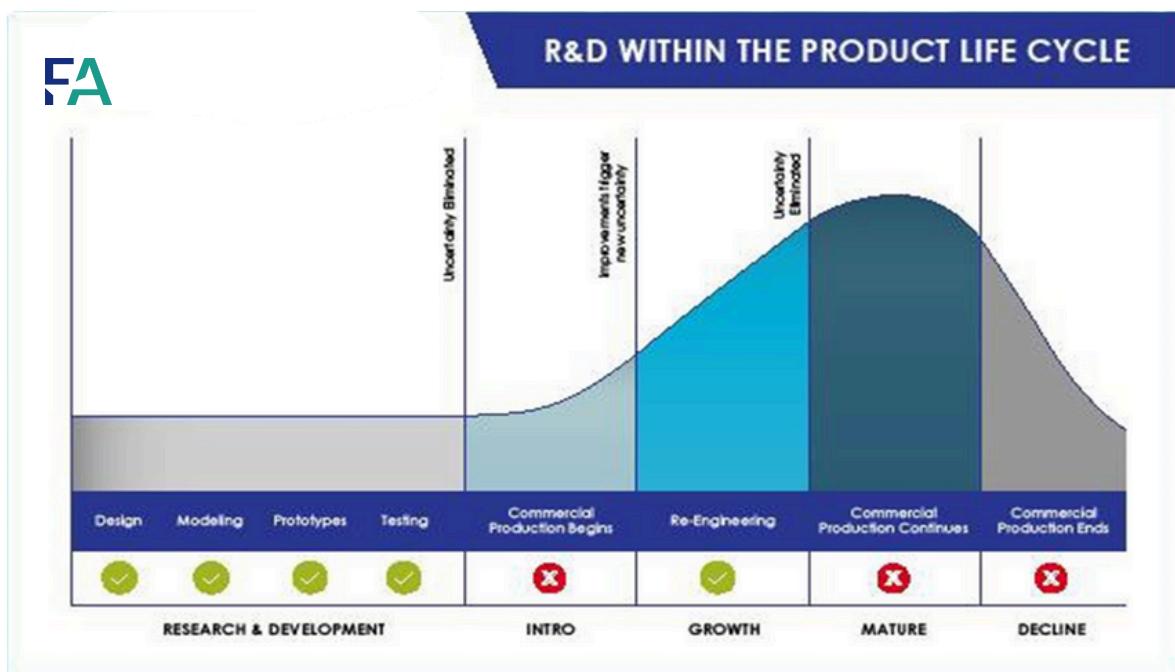

An R&D project typically begins once the company has identified what product or process will be created or improved upon and begins considering the technological challenges that will need to be overcome.

As the company attempts to overcome these challenges, nearly all wages, supplies and contract labor that are necessary to keep the project moving forward are considered necessary parts of the experimentation process and should qualify as research expenses.

When the uncertainty has been eliminated, and the new product or process is ready to sell to the customer, it is no longer an R&D project, and expenses should stop qualifying for the tax credit.

In many cases, the product or process is improved upon in the future. Each time that occurs, a new R&D project exists if it meets all of the tests established on the previous page.

The infographic below illustrates this process:

Case Studies

The following are examples of how Froehling Anderson has helped clients with their R&D Tax Credit.

Case Study #1

- **Company #1:** Distributor, \$40 million revenue
- **R&D Process/Product:** Custom modifications to assemblies of off-the-shelf products
- **R&D Tax Credit Application:** Wages of owners, salespersons, engineers creating the custom modifications.
- **Total Tax Savings:** Average of \$136,000 per year since 2006

Case Study #2

- **Company #2:** Architect, \$4 million revenue
- **R&D Process/Product:** Designing new buildings
- **R&D Tax Credit Application:** Wages of professionals who designed the proposed buildings
- **Total Tax Savings:** Average of \$83,000 per year since 2016

Case Study #3

- **Company #3:** Metal fabrication shop (Contract manufacturer), \$4 million revenue
- **R&D Process/Product:** Product and process design for each new product requested by customers
- **R&D Tax Credit Application:** Wages of owners and employees who helped create the customized parts; materials scrapped in the research process
- **Total Tax Savings:** Average of \$62,000 per year since 2013

How Froehling Anderson Can Help

Comparison of Froehling Anderson and R&D Boutique Firms

Froehling Anderson performs R&D Tax Credit services to all qualified clients. A boutique R&D firm is a consulting firm that primarily focuses on R&D Tax Credit services. While boutique firms vary in their strategies and business practices, the table below summarizes our experiences with them, as compared to our practice:

	Froehling Anderson	Boutique R&D Firms
Fee Structure	Time and Materials: Fees billed at standard hourly rates.	<i>Contingent Fees:</i> Typical fee is 35% of credits generated.
Cost to Benefit Ration	<ul style="list-style-type: none"> Ratio varies but is typically far less than what boutique firms charge. Costs/benefits are estimated upfront and shared before any fees incurred. Engagement is well-managed to ensure costs stay near estimates. 	<ul style="list-style-type: none"> Typical fee is 35% of credits generated. If credits are reduced during an audit, the cost ratio grows as benefit shrinks.
Objectivity	<ul style="list-style-type: none"> CPAs must adhere to ethical standards and charging "contingent fees" would call objectivity into question. 	<ul style="list-style-type: none"> Most boutique firms do not hire CPAs and are not subject to same ethical standards.

How Froehling Anderson Can Help Continued...

Comparison of Froehling Anderson and R&D Boutique Firms Continued...

	Froehling Anderson	Boutique R&D Firms
Audit Guarantee	<ul style="list-style-type: none"> • No firm can guarantee that a credit will withstand an audit without being adjusted. • Both Froehling Anderson and boutique firms guarantee that we will be available to defend our work to an auditor. The difference is in how clients pay for this audit representation. 	
Cost	<ul style="list-style-type: none"> • Froehling Anderson charges for an audit defense when the audit occurs, at standard hourly rates. 	<ul style="list-style-type: none"> • Cost is built into the contingent fee, effectively paying for audit every year.
Better Value When	<ul style="list-style-type: none"> • Audits are infrequent 	<ul style="list-style-type: none"> • Audits are frequent
Audit Preparedness	<ul style="list-style-type: none"> • We advise clients of their options for gathering substantiation, and the risks/ benefits of each. The client chooses the option that best suits their risk tolerance. 	<ul style="list-style-type: none"> • The boutique firm decides which approach to take and does not discuss the risks/benefits of other options with the client.

Why Froehling Anderson?

Froehling Anderson provides business consulting, tax, audit, and accounting services with the same personal delivery of high standards and quality that have sustained us for 79 years.

***There is current legislation pending that would affect the deductibility of the eligible R&D expenses for IRC Section 174. Please be on the lookout for any updates from your relationship manager, our client newsletter, and/or our website.*
