

Budgeting

Budgeting creates a financial model to quantify expected revenue and costs for a given period of time based upon a set of assumptions.

Budgeting Options

"SALY " Budget

- Uses last year as model with teaks for known changes

Zero-Based Budgeting

- Controls costs through justifying of all expenses
- More time consuming than "SALY"

Rolling Budget

- Always budgeting a set period of time into the future
- Cuts down on year end time

Budget by Department

- Useful for controlling costs by area
- Motivates employees but can lead to padding

Hybrid

- Custom plan suited to your specific needs

A hybrid is usually the best option as we can help develop a custom budget suited to your need. Let **Froehling Anderson** help plan your budget today!
